

- ZERO PRESSURE ON BONY AREAS**
- DISTRIBUTES WEIGHT EFFECTIVELY**
- MAINTAINS NORMOTHERMIA**
- NON SLIP BASE FOR INCREASED SAFETY**
- IMPROVED STABILITY AND ACCESS**

EVOLUTION

PATIENT POSITIONERS

The Evolution range uses specially formulated materials and a patented ergonomic design to produce an advanced positioning and pressure care product that is the first and only product in this market to provide clinically backed ZERO PRESSURE during surgery.

Based on current usage of Evolution in hospitals throughout Europe, the following is a list of applicable surgeries and positions by product.

Evolution Product

Head Style 1 & 2

Features & Unique Benefits

Head Support for Supine Positioning provides:

Zero Pressure on Occipital bone and prevention of pressure alopecia

Concave base allows air circulation and maintains normothermia

Anatomical shape cradles the patient's head for increased stability during surgery

Unique design allows ease of surgical access and intubation

Non slip base grips to operating tables mattress for increased safety

Excellent access for surgery for the most delicate of procedures

Burst and tear resistant and easy to clean

Recommended for

Ophthalmic

ENT

Cranio/Maxilla-Facial

Oral / Dental

Thyroidectomy/Neck Surgery

Plastic & Cosmetic Surgery

Cardiac

Sitting/Beach Position

Trendelenburg/Reverse (non slip)

Arm Positioner Set

Arm Positioner with Retainer and Strap provides:

Zero Pressure on Elbow and Ulnar Brachial Nerve

Concave base ensures ventilation and maintains normothermia

Ergonomic Shape helps prevent compartment syndrome

Reduces arterial compression

Provides optimum exposure to IV lines

Anatomical design prevents movement of the arm

Excellent access for surgery

Hand/Arm Surgery

Lateral Position

SUPINE positioning where

arm is placed on side arm

Side Arm Positioner

Side Arm Positioner with Perspex Ski

Side Arm is versatile & can be used in a variety of positions on either side of table

Protects and supports forearm securely

Can offer easy access to arm or cover the arm completely

Quick and easy to install and use

SUPINE positioning where arm

is placed beside the body

Torso Positioners

Features & Unique Benefits

Torso Positioner designed to protect the sacrum and scapula provides:

Zero Pressure on Coccyx, Scapula and Ischial Tuberosity

Concave base allows air circulation and maintains normothermia

Ergonomic design cradles the patient ensuring most natural positioning

Anti slip base grips to operating table for additional safety where table is tilted

Unique design cradles the patient preventing movement during surgery

Recommended for

Cardiac Surgery

General/Abdominal Surgery

Supine procedures

Trendelenburg/Reverse (Non-slip)

Knee & Foot Positioners

Foot & Knee design ensures correct elevation and reduces pressure

Zero Pressure on Heels, Ankles and Popliteal area

Ergonomic design ensures correct elevation and prevents Deep Vein Thrombosis

Concave base allows ventilation and maintains normothermia

Anti slip base grips to operating table for additional safety where table is tilted
